“Did you know?”

Cholesterol is a waxy, fat-like substance that the body needs to function normally. Our bodies make enough cholesterol, so there is no required amount we should eat each day. When you have too much cholesterol- because of diet, how well your body is able to process it, or your genetic history-it can build up in arteries and restrict blood flow to the heart and brain.

NOTE: For additional information, please contact Mrs. Cathleen Garland at (601) 845-2214, ext. 260 or 261 or cgarland@pineywoods.org.
